**Subject:** A new order

Dear Honorable Municipal Leader,

I write to you in regard of an idea greater than myself; for which I would like to propose to you. Humanity as a species is being pushed to the brink of environmental and economic collapse, on an extinction level; by forces of

our own making. In order to guard the remaining life of this planet; we must organize a force of creation to counter these forces of destruction.

The United Federal Republic (UFR) is that force. It is the culmination of humanity as a united species and the unification of our global community. It is a non-hegemonic, nonconforming collective that preserves all cultures; and connects all peoples of the nation, and world, together in a single arena. In order to deal with local and world issues diplomatically and expediently. The goal of the UFR is to establish a system that can responsibly and quickly complete the transition from our current type zero level of civilization complexity. Into a type one civilization. This transition will re-create the very foundation and notion of human life. But will preserve the past as it progresses.

If the Conference of mayors organizes with the federal government to hold a constitutional convention. And if there is coordination with the state and national leagues of cities, including cities in U.S. territories; as well as any and all First Nations and tribes. We can create a strong polis system for every community, dissolve the state structures; and birth the establishment of the United Federal Republic. Using the conference of mayors as city representatives in a transitional federal congress. New elections will have to be conducted on the federal and local levels. Redistricting will be required to remove gerrymandering. Along with the removal of the party system and Electoral College. Massive economic restructuring will have to occur to secure self-sustainability in every community. Along with the development and addition of a Second Bill of Rights including Food, Water, Energy, Infrastructure, Knowledge, and Productive Abilities. As well as the immediate creation of government backed public works programs for the construction of national interconnected communication and transportation between every community.

Should any violence occur; the National Guard and police must be directed towards securing all critical and high level infrastructure; as well as protecting the safety of the entire population from rouge elements. Not protecting commercial or financial industries, and trying to bust peaceful assemblies and gatherings. The role of these forces must be to ensure the security of persons; which requires protecting the population and legitimate infrastructure. Guardianship of the communities; not forces of "Order". The unification of the UFR is required to make secession, separation, civil war, rebellion, nullification, and rouge attitudes obsolete.

Time will decide to honor or vilify you for your actions; either path you choose will immortalize you forever in human history. Choosing the idea of the UFR would offer positive results. Failing to act or rejecting the proposal will have negative outcomes. I wish to inform you of the reality of nearly 100million people who were born after 1984 in this country alone. This is the largest generation in history. And many are angry and restless with the status quo. In addition to this, the Pentagon, the President, and other high-level institutions and individuals have deemed the environmental catastrophe an immediate risk to national security. The environmental collapse is strongly associated with an economic collapse. Intolerance is also a direct threat to national security. These threats to national security deem it necessary for restructuring on a large scale towards ensuring the security of persons to all. A massive public tribunal is required to properly investigate, prosecute and make detailed recordings of the intolerant groups, current Federal, State, and municipal governments, departments, and agencies; all corporations, companies, and industries. Religious structures and groups, social institutions, and any remaining grouping or institution. For the need to establish a new Code of Law; and remove corrupt, hostile, or negative self/special interests. As well as preserving knowledge that can be passed on to new generations and systems. Failure to act will lead to more and more communities and cities igniting in civil unrest; as well as destruction by climatic forces. If you have self-interest or special interest in upholding the status quo; there will be consequences that will impact you the more you perpetuate those interests. I hope this will make you reevaluate your notion of upholding those interests. History honors those who can identify and correct their errors.

In a population of over 330 million, we all have made mistakes; and we all contributed to our present problems. But you have the ability to change things in ways that most will never have the opportunity to. I call upon you and your community to join together in creating this vision of the future. The following links detail more information about the UFR. I look forward to a response; and would be honored to discuss and work with you.

Together, we can achieve far more than we could by ourselves, or in a time of collapse. We are the United States; a union of states, the melting pot of the world. The last global superpower. It is time to redeem ourselves in the eyes of our citizenry and the global community; by becoming a true union of peoples, through the United Federal Republic.

From a concerned citizen who doesn't want to see the U.S to fall into history,

Donald Roth
